Good afternoon:

I sent the below message to the email address for Dr. Krajbich's previous scheduling assistant, Kelly Alexander, but it was returned to me as undeliverable. Does Dr. Krajbich have a new assistant? When you get the chance, please provide me with updated information for this point of contact for Dr. Krajbich. Thank you.

Truly,

Teressa Fauver

Mother of Dr. Krajbich's previous patient, Krystin Fauver (nka Frankie Fauver)

Dr. Krajbich was the surgeon for a spine fusion procedure performed on patient Krystin Fauver (DOB: 02/02/2002) at Shriner's Hospital in Portland a number of years ago. Krystin is nka Frankie.

Frankie is now 18 and reports activity-induced back pain so severe that it interrupts common daily activities and makes it difficult to function normally. It's also made finding realistic, long-term employment a challenge as it has placed restrictions on job options.

Frankie is in Alaska and has sought treatment or a referral from their PCP, who voiced an inability to assist. Can Frankie follow up with Dr. Krajbich or receive a referral from him to a provider who can assist? Thank you for your help,
